

# Emergency O2 Provider Instructor Course

The PADI Emergency Oxygen Provider course represents entry-level training designed to educate participants to provide emergency oxygen first aid to injured scuba divers while activating the local Emergency Medical Service (EMS) and arranging for evacuation to the nearest medical facility. As a PADI 5 Star Instructor Development Dive Resort, Jack's Diving Locker is part of the dive community's ongoing effort to train divers and those in a position to help divers such as boat captains or lifeguards in the proper use of emergency oxygen.

This PADI Emergency Oxygen Provider Specialty Instructor course is for Divemasters or higher who would like to teach the Emergency Oxygen Provider course. Emergency First Response (EFR) Instructors can integrate the O2 Provider course in the EFR course and PADI Open Water Scuba Instructors (or higher) can integrate the O2 course in the PADI Rescue Diver or PADI Divemaster course. This Emergency Oxygen Specialty Instructor course can be taken along with the EFR Instructor course scheduled right before the Instructor Development Course in Jack's Diving Locker's *Go Pro Hawaii* program or may be scheduled by request.
